on the subject of counterpoint as that term is generally understood this book does not profess to be an exhaustive treatise rather is it intended as a practical textbook to deal with the principles of free part writing and to offer suggestions for the cultivation of such a musical instinct that wherever polyphony is desirable in composition the various parts shall be made interesting and truly melodious it seems to the writer that at the present day the import of the word counterpoint is largely historical certainly the rules still in vogue in the majority of the books on counterpoint are those which were practiced when music was under the influence of the old modal system was written almost exclusively for voices and long before the principles of rhythm and of tonality so deeply implanted in our modern instrumental music had come into existence at all moreover in these textbooks there is little to stimulate the imagination of the student or to develop a broad musical judgment the subjects given with their heterogeneous and unrhythmic collection of whole notes seem at best merely to furnish opportunities for the acquisition of a rudimentary power of selection but this selecting and grouping of the various chord factors in the most effective way have already been taught the student during his course in harmony when that subject has been properly taught that is without a servile dependence upon the figured bass system in fact whoever has been writing free exercises in harmony under competent instruction has also been writing counterpoint of a certain kind that is he has been making the separate voices as varied and melodious as possible every one will recognize the great discrepancy in style between the counterpoint of the textbook and that of a mozart string quartet a beethoven symphony or even the contrapuntal accompaniment of a franz song there must of necessity be some difference one is an exercise for the young student the other the work of mature genius nevertheless the difference should be one rather of degree than actually of kind in both exercise and work of creative imagination should be found the broad principles of all musical art there should be life spontaneity and freedom and all the voices whenever possible should say something except where a confessedly homophonic style is being used in music of all arts the letter killeth but the spirit giveth life hence the writer has no sympathy with

the arbitrary division of counterpoint into two classes strict and free

excerpt from tonal counterpoint studies in part writing 1 the first requisite for the student who has just finished the study of harmony is the power to look at music horizontally heretofore he has either built up harmonies on a given bass or placed harmonies below a melody in the soprano to form correct chords and to connect them in a grammatical and fairly agreeable way has taken other voices individually and in its relation to the other voices is chiefly to be considered the eye must follow each part throughout its range and the endeavor must be directed toward the formation of a good flowing melody 2 a second point of difference between the study of harmony and counterpoint is this that whereas the melody has heretofore always been either in the bass or in the soprano nothing is more common in free part writing than to find the melody is so placed there is implied in four part writing the power to invent a bass which shall be good both harmonically and melodically and a melodious interesting soprano besides one inner part at the same time these voices must be so planned that the harmonic background outlined by the notes sounded together on the strong beats shall be natural and satisfactory about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at [forgottenbooks.com](http://forgottenbooks.com) this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

from the preface on the subject of counterpoint as that term is generally understood this book does not profess to be an exhaustive treatise rather is it intended as a practical textbook to deal with the principles of free part writing and to offer suggestions for the cultivation of such a musical instinct that wherever polyphony is desirable in composition the various parts shall be made interesting and truly melodious it seems to the writer that at the present day the import of the word counterpoint is largely historical certainly the rules still in vogue in the majority of the books on counterpoint are those which were practiced when music was under the influence of the old modal system was written almost exclusively for voices and long before the principles of rhythm and of tonality so deeply implanted in our modern instrumental music had come into existence at all moreover in these textbooks there is little to stimulate the imagination of the

student or to develop a broad musical judgment the subjects given with their heterogeneous and unrhythmic collection of whole notes seem at best merely to furnish opportunities for the acquisition of a rudimentary power of selection but this selecting and grouping of the various chord factors in the most effective way have already been taught the student during his course in harmony when that subject has been properly taught that is without a servile dependence upon the figured bass system in fact whoever has been writing free exercises in harmony under competent instruction has also been writing counterpoint of a certain kind that is he has been making the separate voices as varied and melodious as possible every one will recognize the great discrepancy in style between the counterpoint of the textbook and that of a mozart string quartet a beethoven symphony or even the contrapuntal accompaniment of a franz song there must of necessity be some difference one is an exercise for the young student the other the work of mature genius nevertheless the difference should be one rather of degree than actually of kind in both exercise and work of creative imagination should be found the broad principles of all musical art there should be life spontaneity and freedom and all the voices whenever possible should say something except where a confessedly homophonic style is being used in music of all arts the letter killeth but the spirit giveth life hence the writer has no sympathy with the arbitrary division of counterpoint into two classes strict and free
